INDEX OF SUBJECTS AND AUTHORS

Abscess, pulmonary, Four cases of, 377

ACHARD, H. J. Karl von Ruck, 1849–1922, 1053

Acid-fast bacilli, lipin content of, The, 636

Acid-fastness of bacteria, Lipin-protein in relation to the, 642

—— —— tubercle bacilli in tissues preserved in formaldehyde, The lack of, 1114

Action of codliver oil on the tubercle bacillus, The; an experimental study, 938

Active tuberculosis in children, diagnosis of, Observations on the, 213

Adequate prevention of tuberculosis, A brief for investment in, 454

—— tuberculosis program, The elements of an, 154

Adhesions, cauterization of, in artificial pneumothorax treatment of pulmonary tuberculosis, The; technique and indications, together with a survey of results obtained thus far, 871

Adjuvant, physiological, in the rest cure of pulmonary tuberculosis, A, 417

Adults, pulmonary tuberculosis in, clinical pathology of, The; an analysis of 500 necropsies personally performed or observed, 975

After-history of 953 tuberculous patients discharged from the Metropolitan Life Sanatorium from 1914 to 1920, The, 707

AMBERSON, J. BURNS, JR. Further studies of roentgenographic pleural annular shadows in pulmonary tuberculosis, 480

——, ——. ——, ——. The significance of roentgenographic mutations of the lesions of chronic pulmonary tuberculosis, 591

American Public Health Association, Tuberculosis, a chapter of a forthcoming report of the committee on municipal health department practice of the, 960

American Sanatorium Association's classification of pulmonary tuberculosis, The, 611

Anaphylactic reaction, An attempt to differentiate human and bovine tubercle bacilli by means of the, 1087

Anatomic versus the physiological concept, The; A discussion of classifications of pulmonary tuberculosis, 621

ANDRUS, PAUL M. A clinical study of 289 serum reactions with tuberculo-antigens, 694

Animals, experimental, tuberculosis in, dissemination of, Some factors concerned in the, 731

Annular shadows in lung roentgenograms, A criticism of recent interpretations of, 469

—— ——, roentgenographic pleural, in pulmonary tuberculosis, A note on, 477

—— ——, —— ——, —— —— ——, Further studies of, 480

Antigens, Wassermann and tuberculosis, Nonspecific cross-fixation of complement with, 192

Apical pleuritis: a statistical study of stereoscopic roentgenograms of 267 presumably normal students' chests, 106

ARCHIBALD, EDWARD. A note on compression of the lung by paraffin oil in the pleural cavity, 898

ARONSON, JOSEPH D., AND LEWIS, PAUL A. Further studies on the complement fixation reaction as applied to tuberculosis, 1024

Arrested cases of pulmonary tuberculosis, employment of, An experiment in the, 253

Arsenic compounds in experimental tuberculosis, chemotherapy of silver and, Studies on the, 183

Artificial pneumothorax for pulmonary tuberculosis with coexisting diabetes of unusual onset, 399

Artificial pneumothorax, Pleural effusions complicating; their incidence, character and significance, 659
—— ——, practice of, by the Hippocratic School, A note on the, 327
—— —— treatment of pulmonary tuberculosis, cauterization of adhesions in, The; technique and indications, together with a survey of results obtained thus far, 871
Aspiration, pulmonary, of particulate matter, The, 813
——, —— tuberculosis produced experimentally by, 851
Attempt to differentiate human and bovine tubercle bacilli by means of the anaphylactic reaction, An, 1087
Avian tubercle bacilli, cultures of chick embryo tissue containing, The behavior of, 21

Bacilli, acid-fast, lipin content of, The, 636
Bacilli, tubercle, and X-ray findings in 1000 consecutive cases admitted to the Trudeau Sanatorium, A Study of the occurrence of hemoptysis, pleurisy, râles, 1078
——, ——, avian, cultures of chick embryo tissue containing, The behavior of, 21
——, ——, cultivation of, Dorset's egg medium for the, and its modifications, 950
——, ——, human and bovine, An attempt to differentiate, by means of the anaphylactic reaction, 1087
——, ——, —— —— ——, The preservation of cultures of, 1040
——, ——, in sewage, The destruction of, by chlorine, 63
——, ——, lack of acid-fastness of, in tissues preserved in formaldehyde, The, 1114
Bacillus, tubercle, production of carbon dioxide by the, The effect of hydrogen concentration on the, 369
——, ——, The action of codliver oil on the; an experimental study, 938
——, ——, —— utilization of dextrose by the, 44
Bacteria, acid-fastness of, Lipin-protein in relation to the, 642
Bacterial infections, chemotherapy of, Studies in the, III. Experimental tuberculous pleuritis as an aid to chemotherapeutic investigations in tuberculosis, 437
Barlow, Nathan, and Kramer, David. Selective collapse under partial pneumothorax, 75
Basal metabolism rate in tuberculous women, Periodic variations in, 1046
Beasley, Thomas J. The use of calcium in pulmonary tuberculosis 407
Bed rest, The effect of six weeks', upon patients entering Trudeau Sanatorium, 926
Behavior of cultures of chick embryo tissue containing avian tubercle bacilli, The, 21
—— —— extravasated blood in the lungs, An experimental study on the, 1100
Biochemistry and chemotherapy of tuberculosis, Studies on the, XXIII. The chemical composition of calcified tuberculous lesions, 649
Blood in the lungs, extravasated, An experimental study on the behavior of, 1100
Boston, city of, 1898–1921, decline in the number of deaths from tuberculosis of the lungs in the, A statistical study of the, 994
Bovine tubercle bacilli, human and, An attempt to differentiate, by means of the anaphylactic reaction, 1087
—— —— ——, —— ——, The preservation of cultures of, 1040
Bray, H. A. Chronic bronchiectasis terminating in phthisis florida, 1008
——, ——. ——. The mechanism of compensation in pulmonary tuberculosis and its relation to physical signs, 1013
Brief for investment in adequate prevention of tuberculosis, A, 454
Bronchiectasis, Chronic, terminating in phthisis florida, 1008
Bronfin, I. D., and Markel, C. The upper respiratory tract in pulmonary tuberculosis with special reference to laryngeal tuberculosis: a clinical study of 200 cases, 341

BROOKS, MATILDA MOLDENHAUER. The effect of hydrogen ion concentration on the production of carbon dioxide by the tubercle bacillus, 369

BROWN, LAWRASON, AND HEISE, F. H. A study of the occurrence of hemoptysis, pleurisy, râles, tubercle bacilli and X-ray findings in 1000 consecutive cases admitted to the Trudeau Sanatorium, 1078

——, ——, —— ——, ——. ——. The effect of six weeks' bed rest upon patients entering Trudeau Sanatorium, 926

——, ——, —— ——, ——. ——. The intracutaneous reaction of the tuberculous to glycerin bouillon and tuberculin, 1084

BROWN, PHILIP KING, AND BURNHAM, M. P. A criticism of recent interpretations of annular shadows in lung roentgenograms, 469

BULLOCK, E. S., AND FAHLEN, F. T. A report of twenty years' work in the treatment of tuberculosis of the New Mexico Cottage Sanatorium, with an estimation of the part played by climate, 484

BURN, CASPER G. Dorset's egg medium for the cultivation of tubercle bacilli, and its modifications, 950

BURNHAM, M. P., AND BROWN, PHILIP KING. A criticism of recent interpretations of annular shadows in lung roentgengrams, 469

Calcified tuberculous lesions, The chemical composition of; Studies on the biochemistry and chemotherapy of tuberculosis, XXIII, 649

Calcium in pulmonary tuberculosis, The use of, 407

CAMPBELL, HUGH BAIRD, AND KIEFFER, JEAN. The action of codliver oil on the tubercle bacillus; an experimental study, 938

CAMPBELL, LEO K., AND LONG, ESMOND R. The lipin content of acid-fast bacilli, 636

Carbon dioxide, The effect of hydrogen ion concentration on the production of, by the tubercle bacillus, 369

CARROLL, WILLIAM E., AND GIBSON, COLE B. Observations on the diagnosis of active tuberculosis in children, 213

CARTER, H. G. Further observations on pulmonary tuberculosis among negroes, 1002

Case of pulmonary tuberculosis with extensive involvement without symptoms, A, 391

Cast, plaster, in the treatment of pulmonary tuberculosis, The, 410

Causes of the rapidly increasing fall of the tuberculosis death rate in the last five years, The, 282

Cauterization of adhesions in artificial pneumothorax treatment of pulmonary tuberculosis, The; technique and indications, together with a survey of results obtained thus far, 871

Cavity, pleural, paraffin oil in the, compression of the lung by, A note on, 898

Chemical composition of calcified tuberculous lesions, The; Studies on the biochemistry and chemotherapy of tuberculosis, XXIII, 649

Chemotherapy of bacterial infections, Studies in the, III. Experimental tuberculous pleuritis as an aid to chemotherapeutic investigations in tuberculosis, 437

—— —— silver and arsenic compounds in experimental tuberculosis, Studies on the, 183

—— —— tuberculosis, Studies on the biochemistry and, XXIII. The chemical composition of calcified tuberculous lesions, 649

Chests of normal children, Clinical and X-ray findings in the, 331

——, presumably normal students', Apical pleuritis: a statistical study of 267, 106

Chick embryo tissue containing avian tubercle bacilli, cultures of, The behavior of, 21

Child, The transmission of complement-fixing substances from mother to, 127

Childhood, Tuberculosis in infancy and: report of a case with pathological notes on the incidence and necropsy findings in a series of forty cases, 201

Children, active tuberculosis in, diagnosis of, Observations on the, 213

——, normal, Clinical and X-ray findings in the chests of, 331

Chlorine, The destruction of tubercle bacilli in sewage by, 63

Chronic bronchiectasis terminating in phthisis florida, 1008

—— pulmonary tuberculosis, roentgenographic mutations of the lesions of, The significance of, 591

Classification of pulmonary tuberculosis, The American Sanatorium Association's, 611

Classifications of pulmonary tuberculosis, A discussion of; the anatomic versus the physiological concept, 621

Climate, A report of twenty years' work in the treatment of tuberculosis at the New Mexico Cottage Sanatorium, with an estimation of the part played by, 484

Clinic, surgical university, of Frankfurt-am-Main, Germany, The treatment and organization for combating surgical tuberculosis at the, 900

Clinical and X-ray findings in the chests of normal children, 331

—— pathology of pulmonary tuberculosis in adults, The; an analysis of 500 necropsies personally performed or observed, 975

—— study of 289 serum reactions with tuberculo-antigens, A, 694

Coal dust, inhalation of, The influence of the, on tuberculous infection in guinea pigs, Studies on tuberculous infection, IX, 798

Codliver oil, action of, on the tubercle bacillus, The; an experimental study, 938

—— —— in the treatment of tuberculosis, 401

Collapse, Selective, under partial pneumothorax, 75

Compensation in pulmonary tuberculosis, The mechanism of, and its relation to physical signs, 1013

Complement fixation reaction as applied to tuberculosis, Further studies on the, 1024

——, Nonspecific cross-fixation of, with Wassermann and tuberculosis antigens, 192

Complement-fixing substances, The transmission of, from mother to child, 127

Composition, chemical, of calcified tuberculous lesions, The; Studies on the biochemistry and chemotherapy of tuberculosis, XXIII, 649

Compression of the lung by paraffin oil in the pleural cavity, A note on, 898

Conroy, Bernice Brasted, Laird, Arthur T., and Conroy, John M. The destruction of tubercle bacilli in sewage by chlorine, 63

Conroy, John M., Conroy, Bernice Brasted, and Laird, Arthur T. The destruction of tubercle bacilli in sewage by chlorine, 63

Consumptive, working class, expectancy of life of the, Type and environment of employment as factors in the, 69

Controlling factors in phototherapy, 721

Cooke, J. V. The transmission of complement-fixing substances from mother to child, 127

Corper, H. J. Pulmonary tuberculosis produced experimentally by aspiration, 851

——, ——. ——., and Gauss, Harry. The preservation of cultures of human and bovine tubercle bacilli, 1040

——, ——. ——., —— Robin, H. A. The pulmonary aspiration of particulate matter, 813

——, ——. ——., —— Simon, Saling. An attempt to differentiate human and bovine tubercle bacilli by means of the anaphylactic reaction, 1087

——, ——. ——., Kretschmer, O. S., and Lurie, Max B. An experimental study on the behavior of extravasated blood in the lungs, 1100

Correlation of symptoms, vital capacity readings and physical and X-ray findings in 619 cases examined for pulmonary tuberculosis, A; Studies on the respiratory organs in health and disease, VII, 702

CRAIG, FRANK A. The diagnosis of pulmonary tuberculosis from the standpoint of the industrial physician, 265

Criticism of recent interpretations of annular shadows in lung roentgenograms, A, 469

Cross-fixation of complement, Nonspecific, with Wassermann and tuberculosis antigens, 192

Cultivation of tubercle bacilli, Dorset's egg medium for the, and its modifications, 950

Cultures of chick embryo tissue containing avian tubercle bacilli, The behavior of, 21

—— —— human and bovine tubercle bacilli, preservation of, The, 1040

Death rate, tuberculosis, in the last five years, The causes of the rapidly increasing fall of the, 282

Deaths from tuberculosis of the lungs in the city of Boston, 1898–1921, A statistical study of the decline in the number of, 994

Decline in the number of deaths from tuberculosis of the lungs in the city of Boston, 1898–1921, A statistical study of the, 994

Destruction of tubercle bacilli in sewage by chlorine, The, 63

Dextrose, The utilization of, by the tubercle bacillus, 44

Diabetes and tuberculosis, treatment of, Further observations on the, 429

—— of unusual onset, Artificial pneumothorax for pulmonary tuberculosis with coexisting, 399

Diagnosis of active tuberculosis in children, Observations on the, 213

—— —— pulmonary tuberculosis from the standpoint of the industrial physician, The, 265

Disappearance of tubercle, The healing and. Editorial, 238

Discussion of classifications of pulmonary tuberculosis, A; the anatomic versus the physiological concept, 621

Disease, symptoms of, The importance of the study of, illustrated by pulmonary tuberculosis, 134

Dissemination of tuberculosis in experimental animals, Some factors concerned in the, 731

Distribution, lymph node, of experimental tuberculosis in the guinea pig, The, 575

Dorset's egg medium for the cultivation of tubercle bacilli, and its modifications, 950

DUBLIN, LOUIS I., KNUDSEN, INGER A., AND HOWK, HORACE J. The after-history of 953 tuberculous patients discharged from the Metropolitan Life Sanatorium from 1914 to 1920, 707

DULANEY, ANNA DEAN. Nonspecific cross-fixation of complement with Wassermann and tuberculosis antigens, 192

Dust, coal, inhalation of, The influence of the, on tuberculous infection in guinea pigs, Studies on tuberculous infection, IX, 798

——, marble, inhalation of, The relatively early lesions produced by the, and their influence on pulmonary tuberculosis, Studies on the relation of mineral dusts to tuberculosis, II, 782

Dusts, mineral, Studies on the relation of, to tuberculosis, II. The relatively early lesions produced by the inhalation of marble dust and their influence on pulmonary tuberculosis, 782

DWORSKI, MORRIS, AND GARDNER, LEROY U. Studies on the relation of mineral dusts to tuberculosis, II. The relatively early lesions produced by the inhalation of marble dust and their influence on pulmonary tuberculosis, 782

Dysphagia, extreme, Gastrotomy as an emergency and therapeutic measure in laryngeal tuberculosis with, 364

Editorial. The healing and disappearance of tubercle, 238

Effect of hydrogen ion concentration on the production of carbon dioxide by the tubercle bacillus, The, 369
—— —— six weeks' bed rest upon patients entering Trudeau Sanatorium, The, 926
—— —— sunlight and oven heat on experimental tuberculosis, The, 119
Effects, Permanent pulmonary, of gas in warfare, 571
Effusions, Pleural, complicating artificial pneumothorax; their incidence, character and significance, 659
Egg medium, Dorset's, for the cultivation of tubercle bacilli, and its modifications, 950
Elements of an adequate tuberculosis program, The, 154
Emergency and therapeutic measure in laryngeal tuberculosis with extreme dysphagia, Gastrotomy as an, 364
EMERSON, HAVEN. A brief for investment in adequate prevention of tuberculosis, 454
——, ——. The causes of the rapidly increasing fall of the tuberculosis death rate of the last five years, 282
EMERSON, JOHN OLIVER. A statistical study of the decline in the number of deaths from tuberculosis of the lungs in the city of Boston, 1898–1921, 994
Employment of arrested cases of pulmonary tuberculosis, An experiment in the, 253
——, Type and environment of, as factors in the expectancy of life of the working class consumptive, 69
Environment of employment, Type and, as factors in the expectancy of life of the working class consumptive, 69
Equilibrium, Intrathoracic, in pneumothorax, 95
Etiology of tuberculosis, hereditary factor in, The, 547
Expectancy of life of the working class consumptive, Type and environment of employment as factors in the, 69
Experiment in the employment of arrested cases of pulmonary tuberculosis, An, 253
Experimental animals, tuberculosis in, dissemination of, Some factors concerned in the, 731
Experimental peritoneal tuberculosis, Resistance to, following oil injections, 1035
—— pulmonary tuberculosis, resolution in, Healing by, 163
—— studies on tuberculous infection, 1
—— study on the behavior of extravasated blood in the lungs, An, 1100
—— tuberculosis, chemotherapy of silver and arsenic compounds in, Studies on the, 183
—— —— in the guinea pig, The lymph node distribution of, 575
—— ——, The effect of sunlight and oven heat on, 119
—— tuberculous pleuritis as an aid to chemotherapeutic investigations in tuberculosis. Studies in the chemotherapy of bacterial infections, III, 437
Extensive involvement without symptoms, A case of pulmonary tuberculosis with, 391
Extravasated blood in the lungs, An experimental study on the behavior of, 1100

Factor, hereditary, in the etiology of tuberculosis, The, 547
Factors concerned in the dissemination of tuberculosis in experimental animals, Some, 731
—— in phototherapy, Controlling, 721
—— —— the expectancy of life of the working class consumptive, Type and environment of employment as, 69
——, Mechanical, in hemoptysis, 690
FAHLEN, F. T., AND BULLOCK, E. S. A report of twenty years' work in the treatment of tuberculosis at the New Mexico Cottage Sanatorium, with an estimation of the part played by climate, 484
Fall of the tuberculosis death rate, The causes of the rapidly increasing, in the last five years, 282
FINE, M. J. The treatment of pulmonary tuberculosis with sodium morrhuate, 934
FLESCH-THEBESIUS, MAX. The treatment and organization for combating surgical tuberculosis at the surgical university clinic of Frankfurt-am-Main, Germany, 900

FLOYD, CLEAVELAND, AND FROTHINGHAM, LANGDON. Table utensils as sources of tuberculous infection, 51

Follow-up studies, Sanatorium, 320

FOORD, A. G., AND SHIPMAN, S. J. A possible mode of transmission of infection in tuberculosis, 566

Formaldehyde, The lack of acid-fastness of tubercle bacilli in tissues preserved in, 1114

Four cases of pulmonary abscess, 377

Frankfurt-am-Main, Germany, The treatment and organization for combating surgical tuberculosis at the surgical university clinic of, 900

FREED, HAROLD, AND SWEZEY, SAMUEL. Gastrotomy as an emergency and therapeutic measure in laryngeal tuberculosis with extreme dysphagia, 364

FROTHINGHAM, LANGDON, AND FLOYD, CLEAVELAND. Table utensils as sources of tuberculous infection, 51

FUNK, ELMER H., AND LANDIS, H. R. M. Further observations on the treatment of diabetes and tuberculosis, 429

Further observations on pulmonary tuberculosis among negroes, 1002

—— —— —— the treatment of diabetes and tuberculosis, 429

—— studies of roentgenographic pleural annular shadows in pulmonary tuberculosis, 480

—— —— on the complement fixation reaction as applied to tuberculosis, 1024

GAMBLE, CLARENCE J., AND HERRICK, MARGARET C. The utilization of dextrose by the tubercle bacillus, 44

GARDNER, LEROY U. Healing by resolution in experimental pulmonary tuberculosis, 163

——, —— ——., AND DWORSKI, MORRIS. Studies on the relation of mineral dusts to tuberculosis, II. The relatively early lesions produced by the inhalation of marble dust and their influence on pulmonary tuberculosis, 782

Gas in warfare, Permanent pulmonary effects of, 571

Gastrotomy as an emergency and therapeutic measure in laryngeal tuberculosis with extreme dysphagia, 364

GAUSS, HARRY, AND CORPER, H. J. The preservation of cultures of human and bovine tubercle bacilli, 1040

GEER, EVERETT K. Artificial pneumothorax for pulmonary tuberculosis with coexisting diabetes of unusual onset, 399

GIBSON, COLE B., AND CARROLL, WILLIAM E. Observations on the diagnosis of active tuberculosis in children, 213

GILBERT, G. BURTON, NEWMAN, J. A., AND WEBB, GERALD B. The lymphocyte index in tuberculosis, 1073

Glycerin bouillon and tuberculin, The intracutaneous reaction of the tuberculous to, 1084

GOLDBERG, MAX, AND STARRY, A. C. The lack of acid-fastness of tubercle bacilli in tissues preserved in formaldehyde, 1114

GOLEMBE, HARRY, STIVELMAN, BARNETT P., AND HENNELL, HERMAN. Intrathoracic equilibrium in pneumothorax, 95

GOVAERTS, ALBERT. The hereditary factor in the etiology of tuberculosis, 547

Guinea pig, experimental tuberculosis in the, The lymph node distribution of, 575

—— pigs, The influence of the inhalation of coal dust on tuberculous infection in, Studies on tuberculous infection, IX, 798

HANKINS, JOHN L., AND KLOTZ, WALTER C. Permanent pulmonary effects of gas in warfare, 571

HAWES, JOHN B., 2ND. Juvenile tuberculosis, 606

HAYTHORN, SAMUEL R. Some factors concerned in the dissemination of tuberculosis in experimental animals, 731

Healing and disappearance of tubercle, The. Editorial, 238

—— by resolution in experimental pulmonary tuberculosis, 163

Health activities, The relation of the tuberculosis movement to other, 146

Heat, oven, sunlight and, The effect of, on experimental tuberculosis, 119

HEISE, F. H., AND BROWN, LAWRASON. A study of the occurrence of hemoptysis, pleurisy, râles, tubercle bacilli and X-ray findings in 1000 consecutive cases admitted to the Trudeau Sanatorium, 1078

——, ——. ——., —— ——, ——. The effect of six weeks' bed rest upon patients entering Trudeau Sanatorium, 926

——, ——. ——., —— ——, ——. The intracutaneous reaction of the tuberculous to glycerin bouillon and tuberculin, 1084

Heliotherapy for tuberculosis at Hohenlychen (Berlin), 1119

—— in the treatment of laryngeal tuberculosis, 223

Hemoptysis, Mechanical factors in, 690

——, pleurisy, râles, tubercle bacilli and X-ray findings in 1000 consecutive cases admitted to the Trudeau Sanatorium, A study of the occurrence of, 1078

HENNELL, HERMAN, GOLEMBE, HARRY, AND STIVELMAN, BARNETT P. Intrathoracic equilibrium in pneumothorax, 95

Hereditary factor in the etiology of tuberculosis, The, 547

HERRICK, MARGARET C., AND GAMBLE, CLARENCE J. The utilization of dextrose by the tubercle bacillus, 44

Hippocratic school, practice of artificial pneumothorax by the, A note on the, 327

HOFFMAN, FREDERICK L. Pneumokoniosis in the stone industry, 772

Hohenlychen (Berlin), Heliotherapy for tuberculosis at, 1119

HONEIJ, JAMES A. A note on roentgenographic pleural annular shadows in pulmonary tuberculosis, 477

HOWK, HORACE J., DUBLIN, LOUIS I., AND KNUDSEN, INGER A. The after-history of 953 tuberculous patients discharged from the Metropolitan Life Sanatorium from 1914 to 1920, 707

Human and bovine tubercle bacilli, An attempt to differentiate, by means of the anaphylactic reaction, 1087

Human and bovine tubercle bacilli, The preservation of cultures of, 1040

Hydrogen ion concentration, The effect of, on the production of carbon dioxide by the tubercle bacillus, 369

Hypertrophic osteoarthropathy, pulmonary, Torus palatinus: an alleged new sign of, 35

Immunity to tuberculosis, A few observations on, 233

Importance of the study of symptoms of disease, illustrated by pulmonary tuberculosis, The, 134

Index, lymphocyte, in tuberculosis, The, 1073

Industrial physician, The diagnosis of pulmonary tuberculosis from the standpoint of the, 265

Industry, stone, Pneumokoniosis in the, 772

Infancy and childhood, Tuberculosis in: report of a case with pathological notes on the incidence and necropsy findings in a series of forty cases, 201

Infection in tuberculosis, A possible mode of transmission of, 566

——, tuberculous, Experimental studies on, 1

——, ——, latent, Phthisiogenesis and, 525

——, ——, Studies on, IX. The influence of the inhalation of coal dust on tuberculous infection in guinea pigs, 798

——, ——, Table utensils as sources of, 51

Influenza, Pulmonary tuberculosis and; a statistical study of 3,168 consecutive tuberculosis dispensary cases, 684

Inhalation of coal dust, The influence of the, on tuberculous infection in guinea pigs, Studies on tuberculous infection, IX, 798

—— —— marble dust, The relatively early lesions produced by the, and their influence on pulmonary tuberculosis, Studies on the relation of mineral dusts to tuberculosis, II, 782

Intracutaneous reaction of the tuberculous to glycerin bouillon and tuberculin, The, 1084

Intrathoracic equilibrium in pneumothorax, 95

Investment in adequate prevention of tuberculosis, A brief for, 454
